

CoverLite[®]

Corrugated Polycarbonate Panels

“A Cost-Effective Daylighting Solution”

CoverLite[®] Corrugated Polycarbonate Panels feature the latest in product technology, offering outstanding physical characteristics such as high light transmission, advanced UV-protection, and excellent impact resistance. Virtually unbreakable, corrugated polycarbonate panels provide similar optical properties to glass in a much lighter, more durable, glazing product.

Constructed of a single layer of high-performance polycarbonate with “peaks and valleys”, corrugated polycarbonate panels match most standard metal roofing profiles. Panels are available in a wide range of sizes and colors with different degrees of translucency.

The handling and installation of corrugated polycarbonate panels are simple and easy. Panels are light in weight and require no special tools to install. Perfect for many applications, CoverLite[®] corrugated polycarbonate panels keep nature’s elements out while letting daylight in!

Cost-Effective Daylighting Solution

CoverLite® Corrugated Polycarbonate Panels are an ideal alternative to traditional glazings and are suitable for a wide variety of applications where high light transmission is needed in a lightweight sheet.

Extensive research and development ensure all of our corrugated panels have a high resistance to the harmful effects of weather, both in the impact strength to resist hail damage and in UV-protection.

Applications Include:

- Industrial Roofing
- Farm Buildings
- Skylights
- Patio Coverings
- Greenhouses
- Pergolas
- Covered Walkways
- Sunrooms
- Awnings
- Pool Enclosures
- Sidelites
- Vertical Glazings
- Canopies
- Window Replacements
- Shelters and Sheds

PROFILE NAME	RIB SPACING	PANEL WIDTH	STANDARD LENGTH	NET COVERAGE	CORRUGATION DEPTH	LT
CoverLite® MR9"	9"	38"	Up to 36'	36"	.75"	Clear: 90% Bronze: 35% Opal: 55% Softlite: 85%
						
Standard Ridge Cap 						Clear: 90% Opal: 55% Softlite: 85%
Accessories Available: Plastic and Foam Closure Strips, Screws, and Silicone						

High Light Transmission

Corrugated panels offer a high degree of light transmittance due to the high optical properties.

Virtually Unbreakable

Economical and light in weight, corrugated panels are 10 times stronger than acrylic and 200 times stronger than glass!

Easily Fabricated on Site

Corrugated panels are flexible, can easily be cold formed, and will not crack when fabricated.

Warranty

CoverLite® carry warranties against yellowing and breakage caused by hail. Please refer to specific product warranty for details.
